## EXPERIENCE

**Aug 2021 - Dec 2023**
**Back-End Developer | Diacon Medica Technologies**
Working as a Back-End Developer, primarily utilizing the Golang programming language with Echo Framework. Key responsibilities include:
- Developing and implementing new features for the company's product, "Carevo" Apps.
- Participating in project-based programs, such as healthcare and banking sectors.
- Collaborating with mobile and front-end developers to create REST API services.
- Integrating third-party APIs into our products and projects for enhanced functionality.

**Sep 2020 - Jul 2021**
**Back-End Developer | AJAR.id**
- As a Back-End Developer, contributed to the development of new features for our product, AJAR Learning Management System (LMS), using PHP programming language and Laravel framework.
- Actively monitored the system and conducted bug fixes, contributing to the continuous improvement of usability and overall system quality.

**Jan 2020 - Aug 2021**
**Freelance Web Developer | ID Core Indonesia**
Contributed to several projects as a Web Developer, using PHP programming language with the Laravel Framework. The projects encompassed areas such as Payroll and Employee Management, News Portal, and Maintenance/Repair Service Products.
